OBJECTIVE

I desire to contribute to a company whose mission it is to provide excellent customer service and wishes to stay on the leading edge of the ever-changing demands of a competitive marketplace. I am curious, driven to go above and beyond the "standard" by taking ownership, pride, and responsibility for any and all tasks that further the goals of your company. I am a builder of systems and processes, when necessary, to minimize and make doing it correctly repeatable. I work well with others and am willing to collaborate.

Having developed valuable skill sets at the following companies, these are just some of the job skill sets I will be bringing with me to your company. Material Handler (Intersect ENT), Material Coordinator (Applied Materials, Adecco Staffing) / Field Technician (Bird Scooter Rides) / Lead Service Coordinator (Kerring Group) / Purchasing Agent, Logistics Coordinator, Warehouse Manager, Inventory Control, Diabetic Shoe Program Coordinator (Mobility Health Care) / Assistant Purchasing Agent, Outside Sales (Mobility Healthcare) / Lab Assistant, Diabetic Shoe Program Coordinator, Scheduler, Diabetic Shoe Fitter (American Physician Housecalls) / Demolition, Welding, General Contractor Duties (KC Commercial) / Vehicle Alarms, Remote Starts, In Vehicle Entertainment System Installations, Vehicle Custom Sound Systems (JCH Automotive - My Company). Along with a variety of other life experiences that may be directly or indirectly applicable to a given position, have helped prepare me to give to your company and your customers my infectious attitude of gratitude plus an unquenchable desire for living a whole, fulfilling, and humble life.

*Trained * Experienced * Motivated = ready for your company's challenges.

WORK EXPERIENCE

Manufacturing Technician

Applied Materials/ Iconma Staffing | Austin, Texas United States

01/2022 - 07/2022

In this role, my title was manufacturing technician building PIBs which are power supplies for semiconductor chamber heaters that convert silicon wafers into the chips we all use every day. I did not complete the 18 month contract due to health issues that have since been resolved.

Material Handler

Intersect ENT/ Ascent Staffing | Austin, TX United States

07/2021 - 10/2021

I was contracted to help solve some deficiencies in the supply chain at Intersect's Austin office. Being headquartered in Menlo Park California, they did not have the hands on approach that they needed. I was taught QAD to work with the inventory and fulfill sales orders, receive purchase orders, do cycle counting, and inventory adjustments. I used QAD to research the transaction history of specific medical devices, LOT numbers, and serial numbers that were shipped out in order to resolve questions about these items.

I was recognized by Management in Menlo Park for my excellence and integrity while getting the Austin Inventory under control, and was given a Spot Bonus because of my work. The Austin site was involved in a CAPA (Corrective and Preventive Action) which I helped resolve.

These were my daily core functions:

- Received, sorted, and inspected incoming shipments to verify quantity and condition of products.
- Maintained records of all store inventories ensuring sales records and product inventory match.
- Project manager for developing, implementing, and maintaining an inventory control system that Managed inventory control comparing physical inventory with database inventory while correcting and reporting any discrepancies.
- Accurately documented the sale of items for inventory purposes.
- Packaged medical instruments and shipped to hospitals

- and doctor's offices throughout the country.
- Implemented systems and recommended process improvements that will increase inventory accuracy levels.
- Used Microsoft Teams to work remotely with my colleagues in Menlo Park.

Material Coordinator

Applied Materials / Adecco Staffing | Austin, Texas
04/2020 - 06/2021

- As a Material Coordinator at one of Applied Materials satellite warehouses, I work in the Kitting Department helping prepare "kits" to go to manufacturing.
- Auditing - entails verifying that requested part is the part provided along with correct quantities requested.
- Inspecting parts for quality and damage.
- De-trashing, removing boxes, outer bags and seals, removing all coverings to the RED STOP SIGN.
- Using logistics software (LTS & SAP) to move these products logically through the system.
- I am responsible for moving back order items physically and logically through the system. I create BOL's and take them to shipping so they can be taken to manufacturing.
- I often use a pallet jack and an automated shrink wrapper to prepare and bring product to shipping.
- Other skills I have had to do irregularly are receiving products into the warehouse, RTS (Return to Stock) after orders are cancelled, and Blind Cycle Counting for Inventory Control.

Field Technician

Bird Ride Scooter / Target CW | Austin, Texas
10/2018 - 03/2020

- Was counted on to diagnose, make a plan, pull the parts from the appropriate bins in the warehouse, and repair as many scooters as possible each day to a high level of safety and functionality with no supervision
- Rebuilt damaged and malfunctioning scooters, 36volt & 48volt systems
- Troubleshooting of motor control circuits
- Replaced "Brain" units on damaged scooters
- Positioned, installed, diagnosed, repaired and calibrated scooter electrical systems
- Used all types of hand tools and power tools to complete the repairs
- Used digital volt meter to read voltage, resistance, and

- continuity of circuits and wires
- Soldered wire and connectors to maintain current along a distinct path
- Immediately dismantled scooters that had water damage due to EXTREME danger of the lithium battery shorting and starting fire - we had 5 Scooters that caught fire after water damage in our facility

Internet Sales

Self Employed - Internet Sales | Austin, Texas

06/2014 - 10/2018

I spent these years selling online on EBay, Craigslist, 5 Mile, and OfferUp. Doing this provided me the most freedom to pursue my hobbies

: Welding, Electronics, Flying Drones, and taking care of my Wife and Dog.

- Sourced thrift stores, garage sales, auction sites.
- Evaluated and researched items based on how often and for how much items were sold for.
- When needed, negotiated and haggled with customers to come to an agreeable outcome and earn money.
- Extremely capable of identifying items that would sell.
- Excellent at pricing items that would make me the most money and that would sell quickly.

Service Technician Lead

Kerring Group | Austin , Texas United States

01/2014 - 07/2014

Kerring Group is a small family owned DME (Durable Medical Equipment) company that provides wheelchairs, power wheelchairs, scooters, motorized adjustable beds, walkers, etc. Anything that could make someone's life a little easier and more comfortable.

Although my time there was short I did a lot. I left because of a fall down 15 large wooden stairs that I had in December 2013. I didn't know it for 6 months but I had herniated C5 & C6. I had further complications and infection at the surgery site. Because of the size of Kerring Group they needed to fill my position which I totally understood. They offered me another position at the front desk helping, however I decided to go on a different path. We parted ways on good terms.

- Motor replacement.
- Tracked all of the outstanding work orders so nothing fell through the cracks and clients had a good idea when they receive their repaired equipment.
- Once billing got the approval I would order all of the

parts ordered from various vendors.

- I would submit the work orders to billing with all of the required parts to complete the repairs. Billing would then coordinate payment with insurance.
- Once I received a work order I would start diagnosing both the stated problem and looking for anything that was going to become a problem or a safety concern.
- In charge of all service for the above mentioned items.
- Gear box replacement.
- Some Mig welding to repair cracks in frames of power wheelchairs.
- Testing heavy duty batteries 35,55,75, & 100amp gel cell batteries with an exceptional battery load tester.
- Replacing bad power wheelchair joysticks.
- Soldering of broken connections.
- Mounting/ and repairing power lifts for vehicle mounted carriers. Wiring and fusing these systems into the vehicles power system.

Purchasing Agent/Warehouse Manager/Driver Manager/Inventory Control

Mobility Health Care | Lewisville, Texas

09/2011 - 06/2014

- Initially hired to run the Purchasing Department, which entailed purchasing of equipment and supplies for stocking the warehouse and the retail sales floor.
- Assisted with negotiations with supplier and service providers regarding product purchasing.
- Coordinated the return of rejected items to suppliers.
- Managed time-deadlines in a highly fast-paced environment in a courteous and professional manner.
- Communicated with all suppliers.
- Maintained part numbers, descriptions, and general data entry.
- Negotiated best possible price on requested orders to prepare competitive quotes, increase market share and maximize profits.
- Responsible for inventory control.
- Regulated inventory using Auto-Reorder to ensure inventory was available yet lean.
- After 1 month, I was placed in charge of the Warehouse and the employee who stocked the warehouse.
- 1 month later, I was placed In charge of 3 full time

drivers, their routing, and their scheduling.

- I created a 30 page product catalog with pictures, pricing, and descriptions for our companies clients using Publisher. Several thousand of these were printed over a couple years.
- As part of my job I used Excel, Word, Publisher, Bar Code Scanner, POD(Point Of Delivery), & POS(Point Of Sale) equipment.
- I left this great company to move to Austin and marry my sweetheart.

Outside Sales Representative / Assistant Purchasing Agent

Mobility Medical Equipment | Addison, Texas

10/2009 - 09/2011

- Developed new customer accounts, reviewed leads.
- Presented programs, new products, and features to sell the benefits of the company over price.
- Responsible for hitting monthly outside sales goals for the company.
- Moved to Purchasing department after my computer and negotiating skills were recognized.
- Learned from a highly skilled Purchasing Manager.
- Processed approved orders, ensuring successful coordination between Supplier and our warehouse.
- Managed time-deadlines in a highly fast-paced environment in a courteous and professional manner.
- Reviewed requisitions, conferred with vendors for price, availability and delivery schedules
- Negotiated prices to maintain profit.
- Coordinated the return of rejected items to suppliers.
- Worked closely with suppliers to improve operations and reduce cost
- Wrote and expedited purchase orders.
- Worked in a fast pace environment and purchased for multiple areas at one time.
- Inspected and recorded all purchased items

Shoe Fitter/Lab Assistant

American Physician House Calls | Dallas, Texas

03/2006 - 09/2009

American Physician Housecalls was a company that provided Doctor and Nurse Practitioner visits to over 8,000 Medicare patients in their home. This was a great company and provided a vital service. Especially to those individuals that did not have the family or means to get to Doctor offices and other ancillary needs for different

ailments that our older and younger less fortunate individuals suffer from.

- Worked directly with APH's Doctors and Nurse Practitioner's to provide diabetic shoe ware to our Patients (approximately 8,000 Patients)
- Started their diabetic shoe program from the ground up.
- Researched, contacted, and negotiated contracts with several prescription diabetic shoe companies.
- Used the companies EMR (Electronic Medical Records),to filter for diabetic patients.
- Contacted patients and scheduled in home diabetic shoe fittings.
- Due to the success of the shoe program, APH added another Shoe Fitter, Scott, who i managed.
- Because of how well I had done with the Diabetic Shoe Program I was offered a position in the Blood Laboratory that was added to our location.
- Placed all supply orders for the lab and phlebotomists.

General Contractor/Demolition/Welding

KC Commercial Inc | Waco, Texas

01/2002 - 03/2006

KC Commercial INC is a general contractor company that provides build-out of large scale warehouse customization to customers specifications . Normally these types of warehouses must be partially or completely gutted of existing walls and flooring to accommodate the new occupants plans and needs.

- Ran a crew of 2 to 6 people to demolish and clean up drywall, metal studs, ceiling tile, and all plumbing and fixtures. Removed floor tile of many different types.
- Was counted on to be there early and leave when the jobs were complete for the next days build.
- At the end of the build-outs my crew would come back in and make ready the location, offices, warehouse, showroom space for the new occupants to move into.
- Bid on small welding jobs, ie. stair case handrails, ramp side rails, etc.
- Provided building construction and demolition services and adhered to work safety codes.
- Achieved the companies goals by ensuring that schedules and objectives were met.
- Cleaned and prepared construction sites to eliminate possible hazards
- Removed debris and demolished materials
- Helped in loading and unloading of trucks.
- Transported all trash to construction site dumpsters.

Owner/Operator

JCH Automotive | Dallas/Fort Worth Metroplex, Texas
01/1999 - 12/2001

- Provided installation services to 3 Ford Dealerships in the Dallas Fort Worth area of their alarms, remote starts, spoilers, running boards, in vehicle entertainment tv systems with game consoles, cruise controls, leather and wood grain steering wheels, custom wood grain kits, bed liners.
- Design, build and install custom speaker enclosures.
- Maintained high profit margins while offering competitive pricing.
- Worked with a high end leasing company installing vehicle tracking and disablement systems.
- Provided installations at dealerships, customers workplaces, and customers homes. Whatever it took to make it convenient for the customer.

Field Technician/Installer

AER Manufacturing | Carrollton, Texas
02/1997 - 01/1999

The department that I was assigned provided installation and troubleshooting of alarms and add on equipment services to ALL Ford dealerships in the Dallas Fort Worth and Greater DFW Area. It was common to drive to multiple dealerships a day covering more than a hundred miles to provide our equipment and services.

- Installed basic alarms, remote start systems with alarms.
- In vehicle entertainment systems, monitor with dvd and game systems.
- Cruise controls.
- Bed liners, running boards, leather and wood steering wheels, and electric truck rear windows.

EDUCATION

Fullstack Flex Web Development (Coding)

University of Texas at Austin | Austin, Texas United States
2023 - Present

I am currently enrolled and working towards my certification as a Fullstack Web Developer Hosted by University of Texas at Austin. This is a 6 month bootcamp and it has been quite challenging with the pace and load of material to learn. It has been great to stretch my brain

again as most of the jobs and tasks I've had in the last 20 years have been pretty easy. I am currently 7 weeks from graduation. Today is 7/22/23. Our class started with 53 students and as of this past Thursday we have 23 students enrolled. For awhile, I thought I was the only one struggling. As the class proceeded and we had our group projects, I came to understand how challenged my other classmates were as well. It has been quite the journey and I can't wait to accomplish this soon.

Certificate in Basic Electronics in General Studies

GPA: 3.0

Collin County Community College | Plano, Texas

1995 - 1996

- Took all courses available to me involving electronics.
- All other courses of general study were working towards getting my A.A.

General Studies GPA: 3.8

Ventura Community College | Ventura, California

1994 - 1995

- Took courses necessary to achieve my Associate of Arts Degree.
- Had great teachers in several of these courses: History, Speech, and Philosophy.

SKILLS

ELECTRONIC SKILLS:

- Digital & Analog Volt Meters - Taking measurements of Resistance, Voltage, Continuity, Verifying Diodes, Identifying layout of unknown Relays.
- Digital & Analog Power Supplies.
- Basic use of an Oscilloscope.
- Reading of Electronic Schematics ie., Resistors, Capacitors, Inductors & Coils, Relays, Transformers, Bi-Polar Capacitors, Transistors, Fuses, Power Supplies (AC & DC), Integrated Circuits. Also reading most SMT components.
- Troubleshooting of the above listed components using Digital Volt Meter.
- **Soldering** - soldered connections on Bird Scooters, Power Wheelchairs, Vehicle Alarm Systems. I have also completed dozens of component level kits to build things like power supplies, high power laser kits, wave form generator, custom led lighting systems, AC & DC

brushless motor controllers, and more.

- **Arduino micro controller** - followed written instructions, plan schematics, & parts lists to build many Arduino projects. Used iPad and laptop to program Arduino for many fun and useful kits. Robots, sonar, triggering devices, alarm systems, Bluetooth control of remote devices, etc.

TOOLS HAND & POWER:

- Competent in all basic hand tools. Specialty tools such as torque wrenches, micrometers digital and analog, reading a tape measure, stud finder, levels, triangles, vise, rivet gun.
- Competent in power and pneumatic tools. Hand drills, drill press, screw guns, impact driver, air compressor, air scaler, pneumatic impact, miter saw, table saw, skill saw, planar, router, trim router, angle grinders for metal & concrete/masonry, etc.

WELDING:

- Basic ARC welding, MIG Welding, Plasma Cutting, Gas Torch Cutting & Welding
- I own a MIG Welder, Arc Welder, Plasma Cutter
- Hobby MIG welding at home and bid small jobs putting up staircase handrails. Repaired broken motorcycle frame, power wheelchair frames, and four wheeler frames and front ends.

COMPUTER SKILLS AND SOFTWARE:

- Proficient in Windows 10, Excel, Word, Publisher, Power Point, Internet Explorer, Arduino Programming, and many more.
- LTS & SAP Logistics programs that I currently use at the warehouse I work at with Applied Materials.
- IOS, Mac Book, iPad, Numbers, Pages, Keynote, & many more applications & programs.

12 VOLT SYSTEMS:

- I can install ANYTHING in a vehicle platform using 12 Volts.

24 VOLT SYSTEMS:

- Anything pertaining to a Power wheelchair, Disability Scooter, Disability Mobility Equipment.

36 VOLT & 48 VOLT SYSTEMS:

- 2 Wheel Last Mile Scooter Equipment. I worked with 3 different models of Bird and Lime scooters for nearly 2 years.
